PROFESSIONAL SUMMARY

Computer Science student at BINUS University specializing in Software Engineering, with a focus on full-stack web development and hands-on experience in machine learning, Python, and Docker. Built and deployed projects covering NLP classification, regression modeling, and accessible web design. Seeking an internship in software engineering or web development.

EDUCATION

BINUS University Jakarta, Indonesia

Bachelor of Computer Science, Software Engineering 2024 – Present

- Focus: full software development lifecycle, from requirements and design to implementation, testing, and deployment
- Relevant Coursework: Software Design Patterns, Agile Development, Algorithm Design, Database Technology, Object-Oriented Programming, Human-Computer Interaction, Mobile Development, Software Quality Assurance

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript, HTML5, CSS3
Web Development: Node.js, Express.js, Flask, Tailwind CSS, REST API
Machine Learning and Data: scikit-learn, pandas, NumPy, Jupyter Notebook, NLP, TF-IDF, Logistic Regression, Regression Analysis
Databases: MySQL
Tools and DevOps: Git, GitHub, Docker, Docker Compose, Gunicorn, Figma, VS Code, Netlify, Cloud Computing (fundamentals)

CERTIFICATIONS

Introduction to Cloud (CC0101EN), IBM / Cognitive Class October 2026

- Credential: courses.cognitiveclass.ai/certificates/dacb0c4c815e46998cabc40eeeaa4f1e

PROJECTS

Fake News Detection | Python, Flask, scikit-learn, Docker

- Built a machine learning web app and REST API that classifies news articles as real or fake using TF-IDF (10,000 features) and Logistic Regression
- Developed /predict and /health endpoints with Flask and Gunicorn, plus a browser-based interface for testing predictions
- Containerized the application with Docker and Docker Compose; the model trains automatically on container startup
- GitHub: github.com/Rezzz000/FakeNewsDetection

Wuthering Waves Rating Prediction | Python, pandas, scikit-learn, Jupyter Notebook

- Applied data analysis and regression models to in-game character statistics to predict character ratings
- Developed the analysis in Jupyter Notebook using Python, pandas, and scikit-learn
- GitHub: github.com/Rezzz000/PredictionRatingWuwa

eNVision Web | HTML, CSS, JavaScript

- Designed and developed an accessible web platform for a Human-Computer Interaction course, applying usability principles to improve user experience
- GitHub: github.com/Rezzz000/eNVision_web

Personal Portfolio Website | HTML, CSS, JavaScript, Netlify

- Designed and deployed a minimalist, responsive portfolio website showcasing projects, skills, and education
- Live: reyskiazka.netlify.app | GitHub: github.com/Rezzz000/PortfolioWebsite
